EVERY
Word Came From His
Heart
SAYS AGUINALDO
In Speaking of His Address
to Filipinos.
HE SEEMS ANXIOUS TO KNOW
What is Thought of President McKinley
in This Country.

By Associated Press.
Manila, April 2.—A representative of the Associated Press visited Emilio Aguinaldo this afternoon and found him in a large room up stairs, furnished with a table, a typewriter machine, three settees and twenty chairs. His wife was entertaining a number of Filipino women friends in the room while Aguinaldo, smoking a cigar, was chatting with Benito Legardo. The others present were Lieutenant Colonel John S. Mallory, of the 41st Volunteer Infantry, who has charge of Aguinaldo, Lieutenant Gilbert A. Youngberg, of the Third artillery, and Mr. Fisher, Gen. MacArthur's private secretary.
Aguinaldo, whose bearing was courteous and dignified, was dressed in white and looked well. Legardo, who but recently returned from the United States, was telling him about the trip, and he seemed intensely interested, asking numerous questions.
He inquired particularly as to President McKinley and seemed anxious to know what was thought of him in the United States. He was rather reluctant to talk for publication and considered every question carefully before answering it. He said he was doing all he could to assist in the pacification of the Philippines and expressed himself as surprised at what the Americans had accomplished.
When he was first captured, he was, he said, greatly astonished to find that a majority of the Philippines entertained the opinion that American sovereignty was preferable to independence and now he is inclined to believe that way himself. "I am now urging in the strongest possible manner," said he, "that all insurgents should surrender and swear allegiance to the United States."
He expresses the opinion that Tino Lusan, Malvar and other representa-

tives of the insurgents will surrender as soon as they come to understand the nature of the amnesty offered them.

He declared his conviction that the civil government to follow pacification would realize the highest hopes of the Filipino people.

When questioned regarding the report that he would visit the United States he replied that he would like to do so, but had made no plans as yet, placing himself entirely at the disposition of the United States government.

In concluding the interview he observed: "Every word in my address to my countrymen, the Filipinos, came from my heart. I hope the Americans believe me thoroughly sincere in my efforts to secure peace, and under American auspices, to promote the welfare and prosperity of the Philippines."

Midway Wonders.
What the Ferris Wheel was to the Chicago Exposition the "Thompson Aero Cycle" will be to the Pan-American Exposition. It is the altitudinal wonder of the Midway. At each end of a structural iron beam which in operation is revolved by the motor of boyhood is a revolving wheel in which four cars are hung, after the manner of the Ferris Wheel. When one wheel is down, taking on and discharging passengers, the other is revolving 275 feet in the air. The Aero Cycle will be illuminated with 2,000 incandescent electric lights and be operated by power from Niagara Falls.

To visit "The Beautiful Orient" will seem like going to the Old World, for within the entrance everything is characteristic of the East. The streets and buildings are faithful reproductions of streets and edifices typical of the Orient. They will be inhabited by from 250 to 300 Orientals. There will also be a Bedouin Arab encampment and nomads from the Desert of Sahara.

In the "Streets of Mexico" life will be seen exactly as it is in that interesting country. This is one of the largest concessions on the Midway, covering 65,000 square feet of ground. The Mexicans in charge of this concession will wear their native costume, and all kinds of wares peculiar to the country will be sold in the faithfully reproduced Mexican stores. There will be an army headquarters for the convenience of the company of 100 mounted men or "rurales" who will attend the Exposition by order of President Diaz of Mexico.

It Makes Restful Sleep.
Sleeplessness almost invariably accompanies constipation and its manifold attendant evils—nervous disorders, indigestion, headache, loss of appetite, etc. To attempt to induce sleep by opiates is a serious mistake, for the brain is only benumbed and the body suffers. Celery King removes the cause of wakefulness by its soothing effect on the nerves, and on the stomach and bowels.

The Brilliant Colorings in PARIS Millinery
They Are in Keeping with the Colors That Are Being Used in Summer Gowns

Ribbons and Flowers as a Millinery Feature
RIBBONS and flowers comprise the principal trimming for the summer hats that are now beginning to appear to replace the spring hats in the fashionable shops. Judging from the models that are shown it is seemingly safe to predict, even though we had nothing else to judge from, that the summer would be a ribbon season, and that is the verdict of the milliners and modistes. Narrow ribbon is the vogue, and it would seem that it is impossible to get it too narrow and an enormous pink rose covering the entire low crown.

CHARMING MODELS OF PARISIEN SUMMER HATS.

Countless yards of it is gathered into great bunches and piled onto the side or back or front of a hat. Velvet ribbons lead in popularity as a millinery trimming, but aside from these the soft, rich textures are used in preference to the stiffer ones. The colors are in keeping with the colors that are being used in gowns, that means they are unusually brilliant, and of all the brilliant shades none seem to have a lead in popularity.

For some two or three years we have been steadily increasing our use of brilliant colors. Like the cut of garments they come and go, and when we have reached the very height of brilliant colorings, as we seem to have this season, we suddenly drop again to the most staid colors and combinations, going from brilliant reds and blues and yellows, etc., back to the softest grays and faintest browns. If this rule holds good, and I have known it to do so in times past, we added a Parisian smartness that is never successfully copied by others. One of the hats on this order is of fancy Tuscan straw, with the brim turned up in front, with softly draped twists and bows of satin ribbon in the delicate pink of little rosebuds. These also form a bordering wreath all around the brim, with a ribbon drawn around the crown and crossed scarf fashion at the back.

THREE POPULAR PARISIEN MODELS.

should be prepared for a revival of quiet colors for next fall and winter, or at least for next spring, which is yet a long way off, and need not trouble us much.

Same Choice Parisian Summer Hat Models
BUT to again return to the summer hats. How can I better give an idea of their beauty and attractiveness than by attempting a description of some of the models that are being shown.

There is one that has been appropriately called the rose garden that is made of white mousseline de soie, finely shirred, with a fall of white lace over the brim. Under the brim of the left side are bunches of huge pink roses

and a favorite shape is the tam o' shanter crown. Hats of this description are trimmed in many different ways. One of these hats has a much waved brim veiled with softly folded white chiffon. On this is a design of pretty flowers embroidered in black and gold silk. At each side of the crown is a black ostrich feather that droops gracefully over the brim.

A hat that is chic, and yet not decidedly dressy, but which is well adapted for outing purposes if one wishes something more than the ordinary sailor, is of soft straw in its natural color and having a piping of black velvet to follow the graceful curves of a wide brim. The brim is slightly turned at one side with weaves of fancy red ribbon underneath. Around the crown is draped red silk with small loops in front and green foliage around the brim.

A picture hat of white crinoline is a charming affair. It has two white ostrich feathers drooping at one side and numerous black velvet loops to cover the crown, while at the left side are two large roses and loops of the black velvet resting on the hair.

CLOGSTON'S PLANS
Were Frustrated by the Good Work of Officer Putnam.

At midnight as Officer R. G. Putnam was making his rounds on the West Side, he discovered Tom Clogston concealed behind a telegraph pole, with a double-barreled shot gun in his possession. It developed that he was lying in wait for "Curly" Harris and "Red" Roush, with whom he had been engaged in a row in a nearby saloon a short time before.

Officer Putnam immediately disarmed Clogston of the gun, which was loaded with shells filled with No. 5 shot. He also had an ugly knife, and this, too, was taken from him.

Grievances Considered.

By Associated Press.
New York, April 22.—A conference was held today between representatives of the trainmen and telegraph operators employed by the Central Railroad of New Jersey and Superintendent Clausen, of the company. The trainmen's grievances were taken up first. After these are adjusted the telegraphers will be considered. The meeting lasted several hours and progressed satisfactorily. Another meeting will be held tomorrow.

Strikers' Three Corned Fight.

By Associated Press.
Cincinnati, O., April 22.—Firemen in all the breweries in Cincinnati, Covington and Newport struck today for a eight hour day. Nearly fifty men are directly affected and thousands indirectly. It means a three cornered fight between the International Brotherhood of Stationary Firemen, the brewery proprietors and the United Brewery Workmen. The latter organization will stand by the brewery proprietors.

Marietta is Included.

By Associated Press.
Steubenville, O., April 22.—It is given out here that a plan is on foot to consolidate the lamp factories in Marietta, Byersville, Marion, Wheeling, Washington, Pa., Millville, Muncie, Findlay, Corapolis, Zanesville, Albany, Wellsburg and Rochester. The reasons given are saving of expenses by getting nearer coal and natural gas and the fact that in many places it is hard to keep glass workers because of the undesirable locations.
